SPRINGS MADE BETTER™

Part of Lesjöfors Group

## A History of Excellence in Aerospace Design & Engineering

### Trusted for Over 175 Years

John Evans' Sons, LLC, founded in 1850 in New Haven, Connecticut, is America's oldest springmaker. Today, we operate from a 52,000-square-foot facility in Lansdale, Pennsylvania.

#### Aerospace Applications:

- Landing gear
- Flight control
- Aircraft doors
- Cabin seating
- Engine components
- Instrumentation
- Safety systems
- Cargo handling
- Wing flaps and slats
- Satellite Systems

Our tradition of innovation and quality has stood the test of time.

 Lansdale, PA | Serving Global Customers

### Mission-Driven Engineering

Our in-house engineering team combines more than a century and a half of springmaking expertise with cutting-edge design technology.

#### We provide:

- Full Design Support & DFM Guidance
- SolidWorks Integration & File Sharing
- Spring Specification Optimization
- Prototype to Production Support

Whether you're looking to enhance performance or meet rigorous demands, we engineer for excellence.

### Notable Aerospace Programs

We are proud to support mission-critical projects, including:

- Mars Rover Curiosity
- FLIR Camera Mounting Systems
- UAV Launch & Recovery Mechanisms
