3/4" Balance -Pivot Bar Mounting (FG14131)

For single wall jamb: pivot bar to extend .750" + .000" (see below)
shown with outside surface facing up

For double wall jamb:
1. measure depth of shoe pocket (X) (see below)
2. subtract .210", this value (Y) is your extension of pivot bar from sash for proper installation.

Sash as viewed from below

\[ X - .200 = Y \]

Example:
If shoe pocket depth measures 1.060" (X dim.), subtract .200" = .860" (Y dim.)

Align bottom of shoe with dimple & fasten stop mount w/#8 screw.

Align top of upper spring carrier with dimple & fasten stop mount w/#8 screw.
